

Sources of visual images to make information easier to understand

There are different types of visual images, such as symbols, line drawings and photographs, which you can use to make information easier to understand. Some people might find a particular kind of image more useful than others, or one set preferable to another. This may be influenced by cultural concerns.

We have listed some sources of visual images below. Please note that some of these originated in the USA. You may prefer to develop your own set for your whole organisation to use.

Remember that how you use the images is important (see the resource section in 'Graphic design and accessibility') and that it is also important to make sure you simplify the text before adding pictures.

Bonnington Symbol System (BSS)

Follow the link to Tom Orr Accessibility. Tom Orr can design symbols on request, and has over 2,000 BSS symbols in stock. A small range of these have been used in these templates.

Tel: 0776 161 7340

www.tomorraccessibility.co.uk

Somerset Total Communication (STC)

STC produces a 'Simple Symbols' CD of over 4,000 symbols. Available from:
Somerset Total Communication
c/o Resources for Learning,
Parkway, Bridgwater, Somerset TA6 4RL
Tel: 01278 444949

Email: stc@somerset.gov.uk

AIGA

A set of 50 American disability access symbols that can be used to promote and publicise accessibility.

For more information see:

www.aiga.org/content.cfm/symbol-signs

Boardmaker

Contains about 3500 coloured Picture Communication Symbols (PCS). This number can be increased to about 8000 by purchasing addendums. These can be combined or adapted to create more symbols and individualise them.

For more information see:

www.widgit.com

Change Picture Banks

CD-ROMs containing 100s of black-on-white line drawings. These include packs relating specifically to Health and Housing. Individual pictures and 'picture bundles' (sets of about 50 images pulled together by topic) also available. Cost varies.

For more information see:

www.changepeople.co.uk

Photosymbols 3

A set of more than 3,000 photos featuring people with learning disabilities. Backgrounds are removed to aid clarity. You can nominate a client-led organisation to receive a free edition.

For more information, see:

www.photosymbols.com

Hemera Images

Commercial source of about 100,000 high quality photo images.

For more information see:

www.hemera.com

Punchstock

Over 2 million royalty-free photos and illustrations.

www.punchstock.com

Valuing People

Clipart collection with emphasis on images for Government departments' easy read documents. Rates vary, but some free clipart available.

For more information see:

www.inspiredservices.org.uk

Google Images

Contains images in various formats from all over the Web. Click on the image to open the website it exists on. You can click again to enlarge it, and copy and paste into your document. You may need to adjust the size. Be aware that many of the images on the Web are copyright of their owners and you may be breaking the law by using them. If in doubt, ask. Go to www.google.co.uk and click on 'images'.

Digital photography

Probably the most versatile way of producing high quality, locally recognisable images. It is important to gain informed consent before using images of people, especially children. Worth buying image-editing software so that you can modify images to suit, such as Adobe Photoshop, Corel (Jasc) Paint Shop Pro or, for simple changes, try MS Photo Editor (free with MS Office).

Thanks to Elspeth McLean and Eugene Kelly of the Glasgow Learning Disability Partnership for their advice and suggestions for this section.
